

# Clothing Colours for the Camera

What to wear so the family stands out in mountains, forests, water, snow, golden light, fog and temples.

पहाड़ों में कैमरे पर क्या पहनें

# The five rules

---

1. **Wear the opposite of the background.** Green around you → red, rust, pink, coral. Blue water or sky → orange, yellow. Grey-brown rock → any strong warm colour. पीछे जो रंग है, उसका उल्टा पहनें।
2. **Solid, saturated colours.** Plain fabric in a clear colour reads from far away and in a drone shot. Small checks, thin stripes and busy prints shimmer on phone cameras (moiré) and look noisy.
3. **Kids get the brightest colours.** They are the story. Adults wear the deeper, calmer version of the day's palette (maroon instead of red, rust instead of orange, navy instead of royal blue).
4. **Coordinated, not matching.** Pick 3–4 colours for the day that belong together; no two people standing side by side in the same colour. Use one "hero" colour per person.
5. **Skip white, black, neon and logos.** White glares in sun and on snow, black turns into a hole, neon green/yellow casts an ugly tint on faces and clips on camera, big logos and printed text distract (and can be brand trouble on YouTube).

## EASY WINS

- **The jacket is the colour.** In the mountains the outer layer is what the camera sees — buy/keep jackets in the hero colours; inner layers neutral.
- **Accessories rescue a bad outfit.** A red cap, a mustard scarf or a pink backpack adds the pop in any scene.
- **Matte over shiny.** Shiny rain shells reflect the sky and flicker.
- **One colour per person across a day** so viewers recognise who is who in wide shots and drone shots.

## FOR INDIAN SKIN TONES

- Jewel tones (teal, emerald, royal blue, rani pink, maroon, mustard) make skin look warm and healthy.
- Avoid beige, camel and nude near the face — they are too close to skin and wash you out.
- Avoid neon/lime green tops — they reflect green onto the face.
- Deep red and maroon photograph beautifully in every light.

## Mountains — rock, scree, blue sky · पहाड़ — चट्टान, नीला आसमान

Grey-brown rock and a blue sky fill most of the frame. Warm, saturated colours separate you from the rock; one cool colour can work against the brown ground.

### WEAR

**Red** लाल  
#D62828

**Orange** नारंगी  
#F77F00

**Sunflower yellow** सूरजमुखी पीला  
#FFB703

**Rani pink** रानी गुलाबी  
#E0218A

**Deep teal** गहरा फ़िरोज़ी  
#0F7C7C · against brown

**Royal blue** शाही नीला  
#2748A8 · against rock, not sky

### AVOID

**Grey**  
same as rock

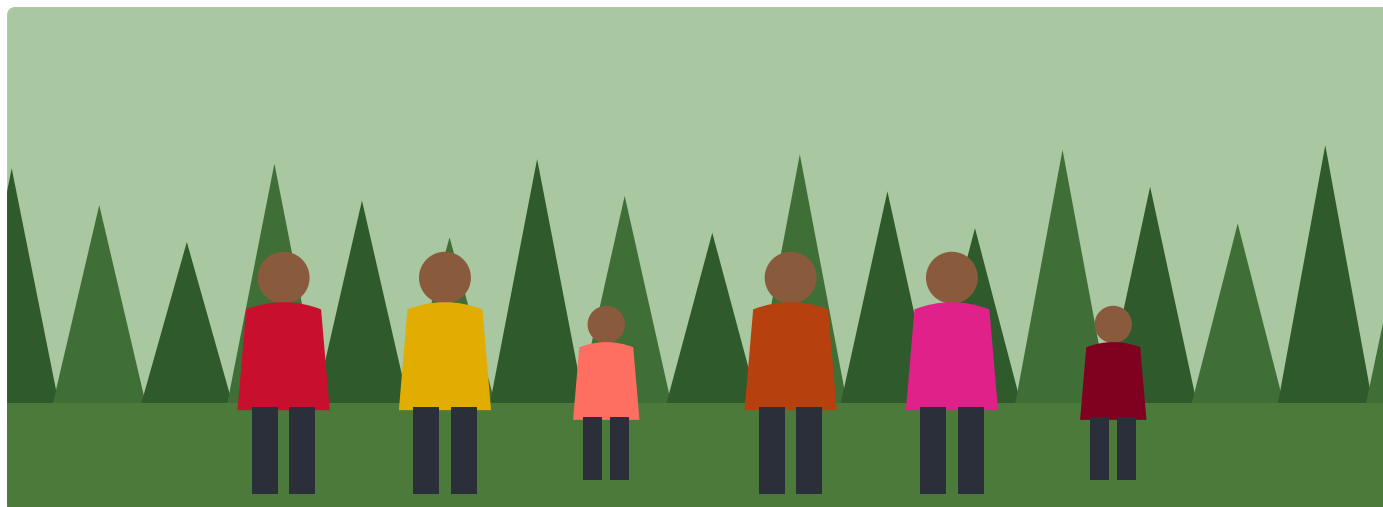

**Khaki / beige**  
disappears on scree

**Brown**  
merges with the ground

## Green — forests, meadows, monsoon hills · हरियाली — जंगल, बुग्याल, बरसात

Green is everywhere, so wear its opposites: red, rust, coral and pink are the strongest. Yellow and mustard glow in the green too.

### WEAR

**Crimson** गहरा लाल  
#C8102E

**Rust** जंग रंग  
#B7410E

**Coral** मूंगा  
#FF6F61

**Rani pink** रानी गुलाबी  
#E0218A

**Mustard** सरसों पीला  
#E1AD01

**Maroon** मैरून  
#800020 · for adults

### AVOID

**Olive / army**  
vanishes in trees

**Any green**  
you become the  
background

**Dark brown**  
lost in the shade

## Water — rivers, lakes, waterfalls · पानी — नदी, झील, झरना

Blue and turquoise water plus sky: orange and yellow are its opposites and pop the most. Avoid white near bright water — it glares and blows out.

### WEAR

**Orange** नारंगी  
#F77F00

**Sunflower yellow** सूरजमुखी  
पीला  
#FFB703

**Coral** मूंगा  
#FF6F61

**Red** लाल  
#D62828

**Magenta** मैजेंटा  
#E0218A

**Rust** जंग रंग  
#B7410E

### AVOID

**Blue / turquoise**  
same as the water

**Bright white**  
glare, burns out

**Pale sky blue**  
melts into sky

## Snow and glaciers · बर्फ़ और ग्लेशियर

Snow is the brightest thing in the frame. Deep, saturated colours look best; white and pastels vanish, black loses all detail next to bright snow.

### WEAR

**Red** लाल  
#D62828

**Royal blue** शाही नीला  
#2748A8

**Emerald** पन्ना हरा  
#0B7A5B

**Mustard** सरसों पीला  
#E1AD01

**Purple** बैंगनी  
#8E24AA

**Orange** नारंगी  
#F77F00

### AVOID

**White / cream**  
invisible

**Pastels**  
washed out

**Black**  
no detail, looks like a hole

## Golden hour — sunrise, sunset · सुनहरा पहर — सुबह, शाम

The light itself is orange. Cool colours (teal, blue, deep green) stand out and flatter skin; orange and yellow clothes melt into the light.

### WEAR

**Deep teal** गहरा फ़िरोज़ी  
#0F7C7C

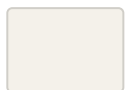

**Royal blue** शाही नीला  
#2748A8

**Navy** नेवी  
#1B3A6B

**Emerald** पन्ना हरा  
#0B7A5B

**Off-white** हल्का सफ़ेद  
#F4F1EA · glows in soft light

**Purple** बैंगनी  
#8E24AA

### AVOID

**Orange**  
merges with the light

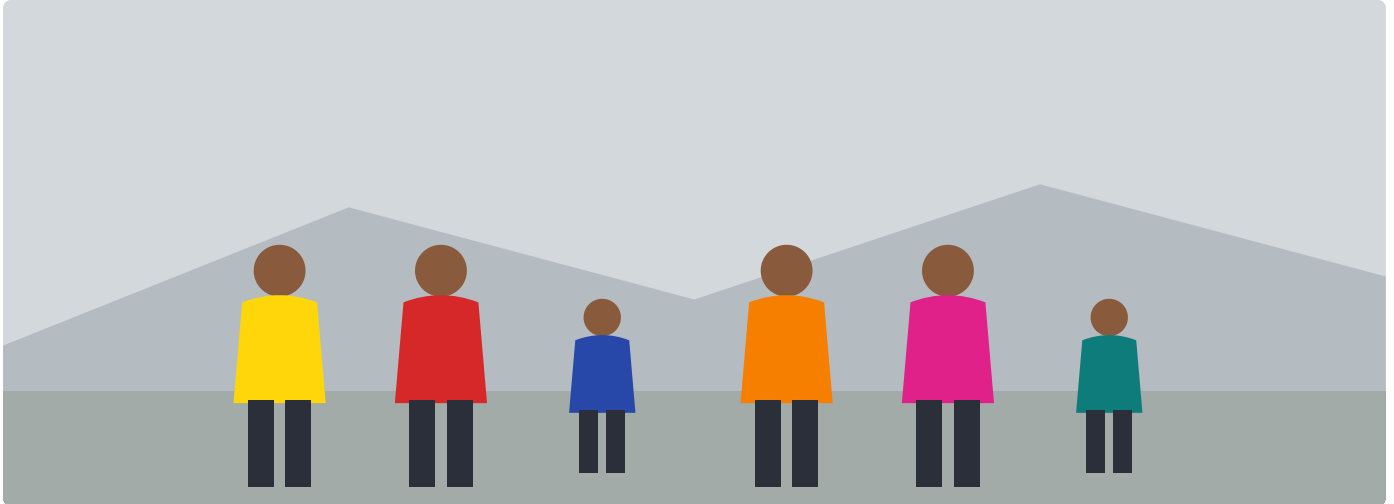

**Yellow**  
merges with the light

**Beige**  
flat

## Fog, clouds, rain, overcast · कोहरा, बादल, बारिश

Grey light removes colour from everything, so bring the brightest pieces you own — the yellow raincoat, the red jacket. They carry the whole shot.

### WEAR

**Raincoat yellow** बरसाती पीला  
#FFD60A

**Red** लाल  
#D62828

**Orange** नारंगी  
#F77F00

**Rani pink** रानी गुलाबी  
#E0218A

**Teal** फ़िरोज़ी  
#0F7C7C

**Royal blue** शाही नीला  
#2748A8

### AVOID

**Grey**  
same as the fog

**Dusty pastels**  
look dirty

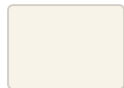

**Black**  
heavy, no detail

## Temples and towns · मंदिर और बाज़ार

Temples are already saffron, red and marigold. Clean white or cream and cool jewel tones stand out and look respectful; saffron and red disappear into the décor.

### WEAR

**White / cream kurta** सफ़ेद /  
क्रीम  
#F7F3E8

**Deep teal** गहरा फ़िरोज़ी  
#0F7C7C

**Royal blue** शाही नीला  
#2748A8

**Emerald** पन्ना हरा  
#0B7A5B

**Purple** बैंगनी  
#8E24AA

**Navy** नेवी  
#1B3A6B

### AVOID

**Saffron**  
same as the temple

**Red**  
merges with décor

**Marigold yellow**  
merges with garlands

# In the car — filming through the glass · गाड़ी के शीशे से

Here the colour rule flips: **whatever is bright inside the car shows up as a reflection on the windshield.** Outdoors wear the bright hero colour; in the front seats, cover it.

## CLOTHES IN THE CAR

- **Front seats: dark, matte tops** (navy, charcoal, maroon, bottle green) or throw a dark jacket over the bright one while filming.
- No white or neon in the front seats — a white shirt becomes a ghost across the road.
- Kids in the back can stay bright; the back seat reflects far less.
- Take off shiny sunglasses and watches near the phone; they flash in the glass.

## THE PHONE AND THE GLASS

- **Black non-slip dash mat** — a black matte dashboard can't reflect.
- **Silicone anti-reflection lens hood** pressed flat on the glass, or the lens touching the glass.
- **Clip-on polarising filter (CPL)**: turn it until the glare on the glass disappears.
- Clean the glass inside and out, wipe the lens, dim the phone's screen.
- Film from the shady side; side windows reflect less than the windshield; an open window reflects nothing (when safe).

**Already filmed with reflections?** In Resolve: *Reflection - Clean Selected Clips* removes the dashboard / phone reflection, and the colour tool *SPP Glass Glare* takes off the milky glare (Kit Guide \$15e).

# Family colour plan

One hero colour per person, changed by the day's main location. Kids brightest, adults the deeper tones. Print this page and tick what's packed.

| Day's main scene         | Pihu                        | Oju                      | Meenakshi             | Alka                   | Pushpender              | Brijesh                |
|--------------------------|-----------------------------|--------------------------|-----------------------|------------------------|-------------------------|------------------------|
| Forest / green hills     | <div></div> Red             | <div></div> Mustard      | <div></div> Rani pink | <div></div> Coral      | <div></div> Rust        | <div></div> Maroon     |
| River / lake / waterfall | <div></div> Orange          | <div></div> Yellow       | <div></div> Coral     | <div></div> Magenta    | <div></div> Red         | <div></div> Rust       |
| Rocky mountains / pass   | <div></div> Yellow          | <div></div> Red          | <div></div> Rani pink | <div></div> Teal       | <div></div> Orange      | <div></div> Royal blue |
| Snow                     | <div></div> Red             | <div></div> Mustard      | <div></div> Purple    | <div></div> Emerald    | <div></div> Royal blue  | <div></div> Orange     |
| Temple / town day        | <div></div> Teal            | <div></div> Purple       | <div></div> Cream     | <div></div> Royal blue | <div></div> White kurta | <div></div> Navy       |
| Sunrise / sunset shoot   | <div></div> Teal            | <div></div> Royal blue   | <div></div> Off-white | <div></div> Purple     | <div></div> Navy        | <div></div> Emerald    |
| Rain / fog               | <div></div> Yellow raincoat | <div></div> Red raincoat | <div></div> Pink      | <div></div> Orange     | <div></div> Royal blue  | <div></div> Teal       |

## PACKING CHECKLIST (PER PERSON)

- ☐ 1 jacket in the person's hero colour (red / yellow / orange / pink / teal)

☐ Solid-colour T-shirts / kurtas — no big logos

☐ Cap, beanie or scarf in a bright accent colour

☐ Kids: the two brightest jackets / raincoats

☐ Backpack in a bright colour (shows in wide shots)
- ☐ 1 warm top in a second strong colour

☐ 1 cream or white kurta for temple days (adults)

☐ Raincoat: yellow or red, matte

☐ Avoid packing: army / olive, grey, beige, all-black outfits

☐ Front-seat filming: 1 dark jacket / dark top (no reflections)

**In Resolve:** if a shirt still blends in, the Color page can lift it: *Qualifier* on the clothing hue → a little Saturation and Hue shift (keep skin untouched with the skin-tone line on the vectorscope).
